PROFESSIONAL SUMMARY

5 years of full-time relevant experience as a Senior Technical Engineer and as a DevOps Engineer. Good knowledge of technologies and exposure to many DevOps tools and platforms. A clear understanding of the CI/CD pipeline, Continuous Integration, Continuous Deployment, and Continuous Delivery. Result-oriented efficiency with good troubleshooting and analyzing skills. Deep passion for technology and ability to work efficiently both individually and in a team.

EXPERIENCE

Senior Technical Support Engineer

Nexus Techno Solutions | Jan 2019 – Aug 2023

- Implemented automated deployment processes using Jenkins and Docker, reducing deployment time by 60%.
- Orchestrated CI/CD pipelines in projects, resulting in a 30% decrease in post-release issues.
- Implemented Docker in projects, resulting in a 60% improvement in application deployment efficiency.
- Reduced containerization-related issues by 75% through optimized Docker configurations.
- Managed AWS infrastructure, optimizing resource utilization and achieving a 20% cost reduction.
- Utilized Ansible to streamline configuration management, reducing configuration-related incidents by 25%.
- Implemented version control for configuration files, reducing configuration drift by 40%.
- Integrated security practices in CI/CD pipelines, reducing security vulnerabilities by 30%.
- Established monitoring solutions with Prometheus and Grafana, reducing mean time to detect issues by 40%.
- Utilized Terraform to define, provision, and manage infrastructure; automated resource provisioning using Terraform modules, reducing provisioning time by 60%.
- Orchestrated Kubernetes deployments for projects, resulting in a 75% improvement in scalability and resource utilization.
- Excellent problem-solving skills and leadership quality.

TECHNICAL SKILLS

Operating Systems: Ubuntu

Automation and CI/CD: Jenkins

Containerization: Docker, Kubernetes

Cloud Platforms: AWS

Configuration Management: Ansible

Infrastructure as Code (IaC): Terraform

Monitoring and Logging: Prometheus, Grafana, ELK Stack

Version Control: Git

Scripting and Automation: Shell Scripting, Python

Security: SonarQube, Trivy, Snyk

Networking Tool: Nginx

PROJECTS

Automate Database Backup and Restoration on AWS

Mentorminds, Co-Certified by AccionLabs | Oct 2023 – Nov 2023

- Developed and implemented robust Python scripts to automate backups of AWS RDS MySQL databases.
- Leveraged AWS Lambda for scheduling and executing backup tasks, ensuring seamless and efficient operations.
- Integrated scripts with Amazon S3 buckets to securely store and manage database backups.
- Orchestrated the deployment of Python scripts within Docker containers using Amazon Elastic Container Registry (ECR), ensuring consistency across development, testing, and production environments.
- Achieved significant time and resource savings by automating the entire database backup process, enhancing system reliability, and reducing manual intervention.

Smart Health Monitoring System Using Cloud

Saket College of Management | Jan 2023 – Aug 2023

- Designed the system with a health-monitoring function in a Python script within a Docker container.
- Spearheaded the development of a robust containerized application using Python and Docker to monitor system health.
- Utilized Docker to containerize the application, ensuring seamless deployment across various environments with minimal dependencies.
- Orchestrated the deployment and scaling of the containerized application using Docker.

CERTIFICATIONS

- Pursuing AWS Cloud Practitioner Certification
- Certified Jetking Master's in Network Administration + CloudV2
- Certified AWS Re/Start

- Certified AWS Cloud Essentials
- Certified Cisco Python Essentials
- Certified IBM Docker Essentials

EDUCATION

Saket College of Management | Mumbai University

Master of Science in Information Technology | CGPA 9.42 | Jul 2021 – Aug 2023

S.H Mutha College | Mumbai University

Bachelor of Science in Information Technology | Grade A | Apr 2014 – Jul 2017
